FinMorphs

Site Visit Financial Due-Diligence Report

Evidence-led review of operations, financial assumptions, verification needs, and analyst decisions

How to read this report

This report connects the submitted visit evidence to possible operational and financial implications. Evidence is not treated as proof of performance: findings identify sources, uncertainty, unknowns, and the verification work needed before decisions.

Report generated	24 Oct 2026, 02:00 PM
Evidence-led scope	Visit context, media, tour notes, and financial model
Decision status	Human review required before relying on findings

Smart Glasses pipeline summary

Pipeline item	Captured value
Analysis mode	Demo simulation (sample report)
Photos submitted	2
Videos submitted	1
Voice notes submitted	2
Tour notes	1
Zone observations	2
Glasses assistant response	Available
Simulation scenario	Warehouse Visit (Bottleneck & Aging Stock)
Simulated photos / videos / voice notes	2 / 1 / 2

Smart Glasses Physical Audit Log

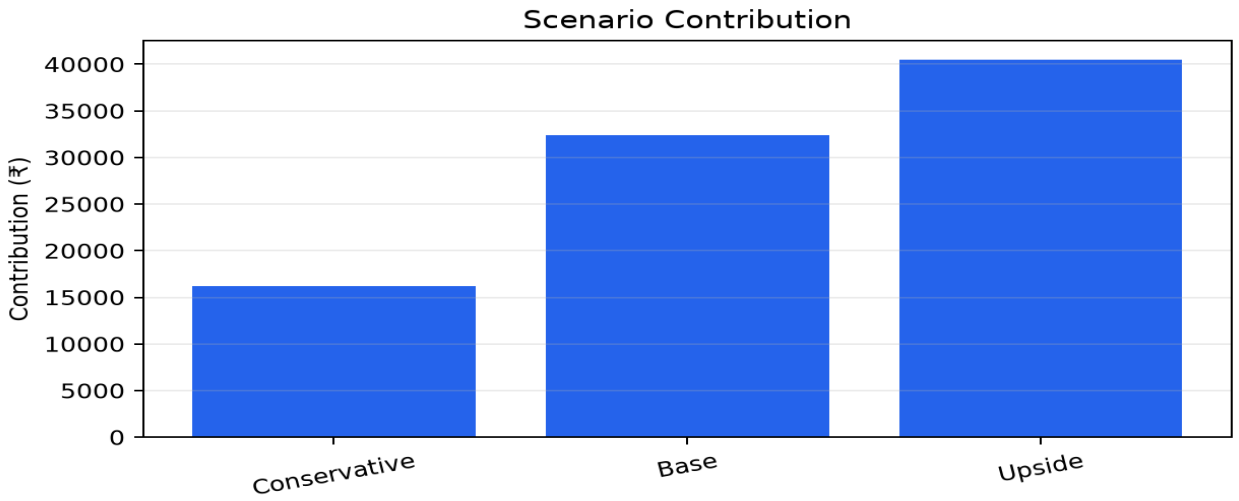

Observed physical cue	Operational context	Financial impact
Idle assembly line (simulated)	Zone A (Packaging); 25 minutes idle time observed	Lower monthly output and fixed-cost absorption pressure
High stock aging (simulated)	Zone B (Storage); dust accumulation requires recertification	Potential working-capital lock-up and write-off risk

Visit summary

- Company/supplier: Sample supplier
- Location: Sample warehouse
- Analyst question: What could limit scalability?

Scenario analysis

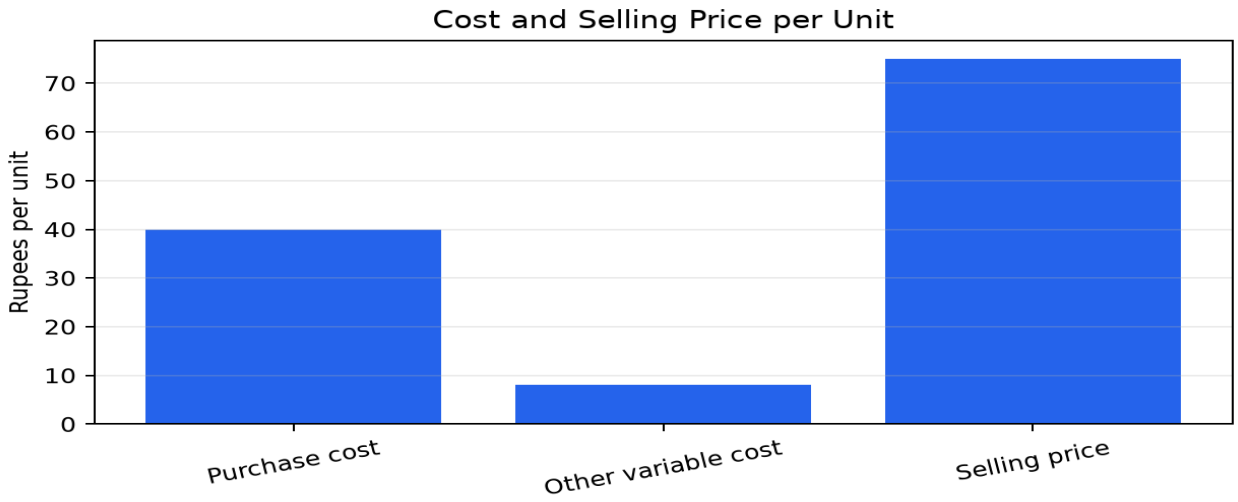

Scenario comparison

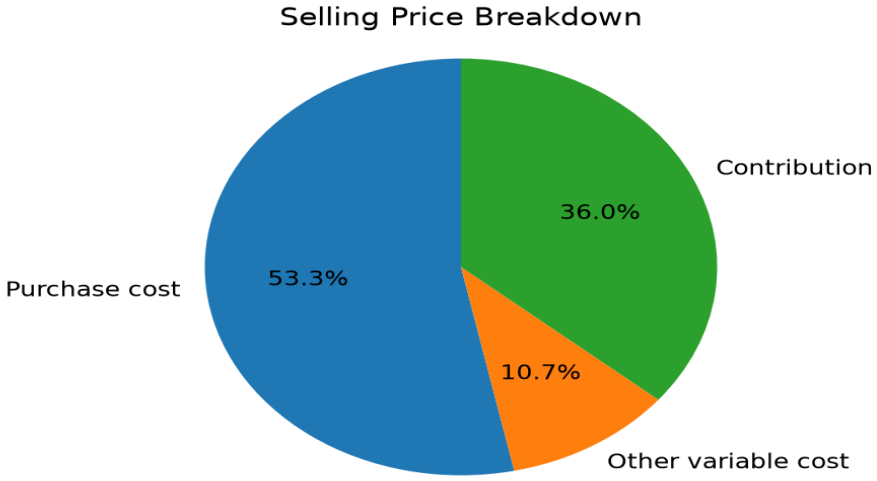

Scenario	Units/month	Inventory cost (■)	Contribution before fixed costs (■)
Conservative	600	24000.00	16200.00
Base	1200	48000.00	32400.00
Upside	1500	60000.00	40500.00

Supplied financial inputs

Unit economics

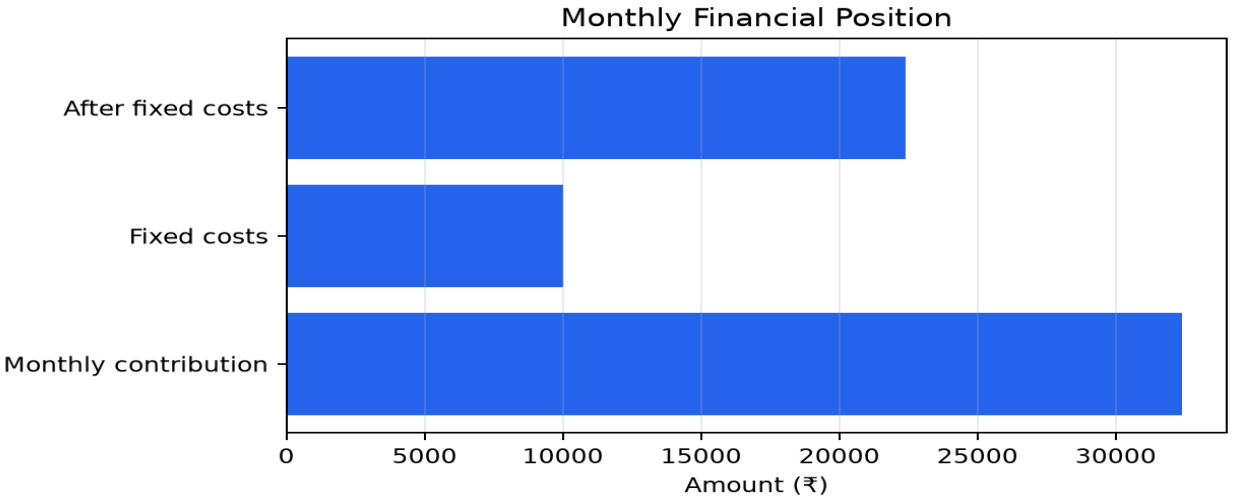

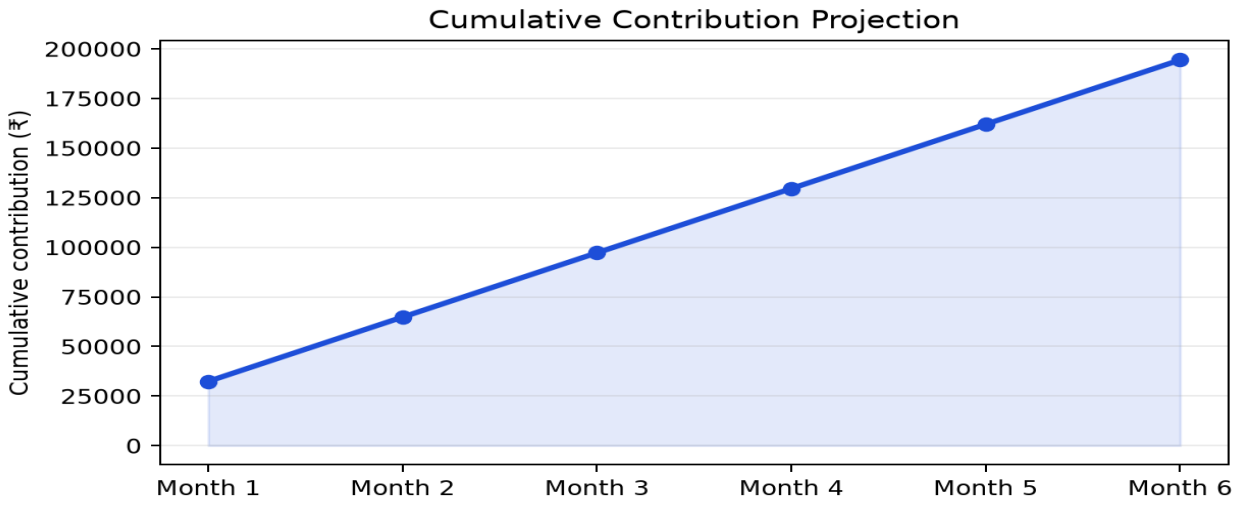

- Purchase cost/unit: ■40.00
- Selling price/unit: ■75.00

Calculated snapshot

Financial position

- Monthly contribution before fixed costs: ■32,400.00

Human review reminder
Do not treat AI findings, visible conditions, user-entered financial inputs, or scenario outputs as independently verified facts. Confirm material concerns with documents, measurements, records, and responsible stakeholders before making financial, supplier, inventory, or operating decisions.
